Thanks Sean. Will we want to include just DEQ on this meeting or the entire TCT?

Scott, Will leave it to Davis to assign someone to approve this request. It's ok by me.

Thank you.

Hi Sean,

We estimate an LOE of (b) (4) to develop fish tissue concentration dot maps for the other COCs requested by DEQ, evaluate the lipid correlations for the 2011 study, and present results to DEQ.

Alternatively, to present the summary stats for the other COCs that we already developed for the focused COCs would be a (b) (4) LOE. Let us know how you would like us to proceed.

Thanks,
Scott

Yes please LOE for a webex only transmittal.

Thanks

Hi Sean,

As a follow up to your email to Sheryl, we do already have summary stat plots for the other Table 17 fish COCs developed but were not presented during today's data meeting. We do not however have maps developed for these other COCs and were not planning on developing them.

Let us know if you would like us to provide an LOE request for developing these maps as well as DEQ's request to perform the lipid correlations with the 2011 study.

Thanks,

Kyle Vickstrom

Hello Sheryl, My thoughts are that we cannot share this type of evaluation in writing with DEQ as they cannot withhold from foia. We could offer a webex of such data presentation.

Do you have any input on how you'd like us to proceed?

Thank you.

Subject: Fish Tissue Data Analysis

Hi Kyle and Sean,

Thanks again for the very informative presentation this morning. As I mentioned during the meeting, DEQ is interested in any fish tissue concentration data mapping or statistical evaluation for dieldrin, chlordanes, BEHP, and/or mercury. It sounded like perhaps you had already done some statistical analysis? If you have anything you could share, even if it's preliminary, I'd appreciate seeing it (I would consider this MOU confidential, of course, and not use it except to inform DEQ's understanding of the data).

As always, if you'd like to talk through any of the results in the Downtown/Upriver Reaches, I'm happy to discuss.

Thank you!

Madi
